Containerization

Web Services

Performance Optimization

System Scalability

Profile Summary

- Proficient in front-end development technologies such as HTML, CSS, and JavaScript with **React**, with hands-on experience in building a responsive analytics application interface.
- Demonstrated ability to collaborate effectively in a team environment to meet **project deadlines and deliver high-quality code.**
- Collaborated in a team to complete a front-end project within a **tight deadline of 4 weeks.**
- Strong problem-solving skills honed through practical experience in troubleshooting and debugging front-end functionalities.
- Eagerness **to learn and adapt to new technologies and methodologies**, evidenced by proactive engagement in professional development courses and self-directed learning initiatives.
- Effective communication skills in conveying technical concepts to diverse audiences, enhancing team collaboration and project alignment.

Work Experience

Web-development Intern	
Codsoft, India	**May 2024 – June 2024**

Responsibilities:
o Designed and developed prototypes in Figma and translated them into responsive front-end code using HTML, CSS, JavaScript, and React.
o Collaborated closely with team members to ensure alignment between design mock-ups and implemented front-end features, utilizing React components effectively.
o Conducted regular code reviews and provided constructive feedback to improve React component reusability and maintain coding standards.
o Assisted in the integration of front-end components with back-end services, utilizing React for efficient data handling and application functionality.
o Contributed to the optimization of React components for improved performance and user experience metrics.

Achievements:
- Successfully implemented the front-end of an analytics application prototype using React, enhancing user interface responsiveness and functionality.
- Demonstrated adept problem-solving skills by resolving front-end issues during development, ensuring timely project delivery and client satisfaction.

Academic Projects

Car-rental
Link: https://car-rental-harjap-snghs-projects.vercel.app/
Tools: React, SCSS
Roles: Front-end web application, Deployment
I developed a car rental web application using React and SCSS, focusing on intuitive user interface design. Implemented features include vehicle selection, booking management, and responsive layout design.
